KEY PROFESSIONAL EXPERIENCE

Cory has over 8 years of experience across a broad spectrum delivering fire protection engineering project work including; fire protection reports, alternates, code research and application, hazard analysis, life safety design, project consultation, CxA smoke control system commissioning, and forensic analysis. He has worked on numerous fire protection projects throughout the Western United States on a wide variety of building types including; commercial, large-scale assembly, multi-family residential, and industrial projects for private, public, and military applications. He is a registered engineer in both Fire Protection Engineering and Mechanical Engineering, which gives him a greater understanding of the relationship between all active and passive building controls and systems. As a LEED Green Associate, Cory integrates additional design elements such as energy conservation and green buildings into the overall project delivery experience he provides his clients.
